Once upon a time...

A STORY IN 3 PARTS

WESTFIELD GROUP℠
Sharing Knowledge. Building Trust.

Welcome to Westfield Group.

since 1848

Cleveland, OH

Indianapolis, IN

Columbus, OH

Nashville, TN
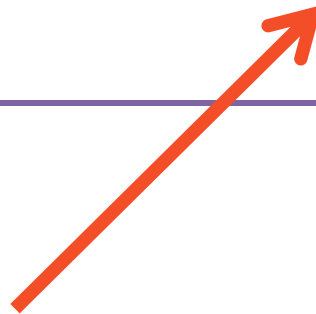

SO, YEAH, ...CARTS AND HORSES...

...5 GUYS AND NO CERTS

CONTEXTUALIZATION
You keep using that word.
I do not think it means what you think it means.

INCONCEIVABLE!

WESTFIELD GROUP
Sharing Knowledge. Building Trust.

THERE IS NO SPOON

SO YEAH, MOVING ALONG
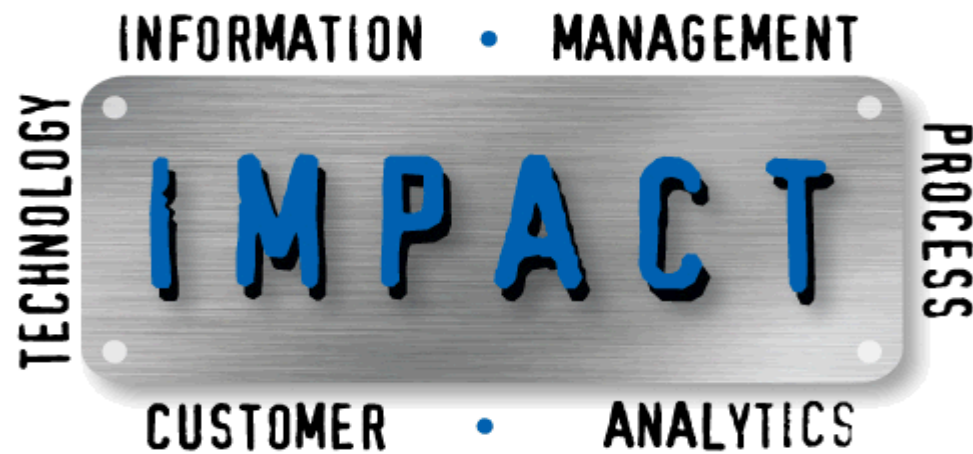

THE 1ST STEP OF FIXING A PROBLEM IS RECOGNIZING YOU HAVE A PROBLEM

ONE DIRECTION?

This isn't working at all... I should warn others not to put their cart before the horse.

MIKE TYSON MYSTERIES
ULTIMATE JUDGMENT DAY

SHARE THIS VIDEO: Facebook Twitter
11:15 | VIEWS: 25,981

Someone at a well known computer company needs Mike Tyson's help, but whom? And when the team arrives at the company headquarters, a highly publicized chess match between one of their supercomputers and Garry Kasparov complicates matters. So does Mike Tyson's savage beating of Garry Kasparov.

(STUB FOR IBM MATURITY WORKSHOP...DON'T FORGET TO ADD COOL STUFF)

WESTFIELD GROUP℠
Sharing Knowledge. Building Trust.

IBM Enterprise Security Maturity Workshop

This high-level workshop will assess the security posture of 35 controls across five domains: **Security Analytics and GRC, People, Data, Application, Infrastructure.**
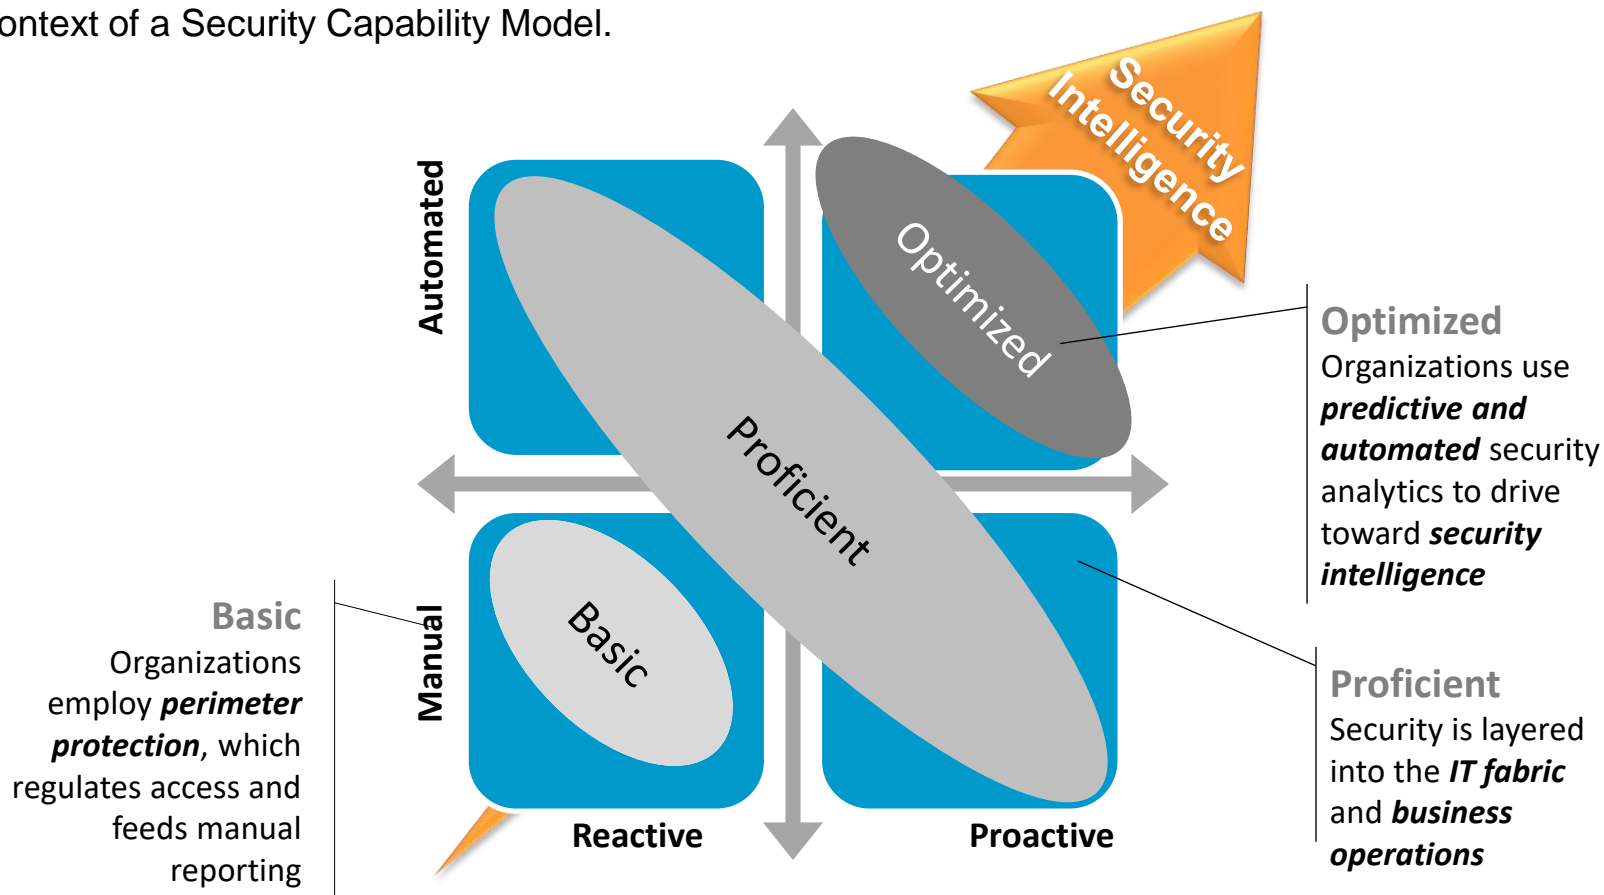

IBM recognizes that all organizations are somewhere on a security continuum ranging from "basic" to "optimized". The ESMW utilizes IBM methods, tools and intellectual capital to assess enterprises in the context of a Security Capability Model.

Optimized
Organizations use *predictive and automated* security analytics to drive toward *security intelligence*

Proficient
Security is layered into the *IT fabric* and *business operations*

Basic
Organizations employ *perimeter protection*, which regulates access and feeds manual reporting

Enterprise IT Security Maturity Workshop (ESMW) "at a glance"

The IBM ESMW helps clients determine their "security maturity":

1 day workshop addresses end-to-end Enterprise Security at a high level
Offered only to selected Global 2000 and similar sized Public Sector clients
Analysis and results are Client and IBM Confidential
Clients objectives and priorities identified from the post workshop
roadmap will be shared with the appropriate IBM teams for follow up and
action

Client benefits:

Improved visibility into the Enterprise "as-is" and "to-be" security postures
Fosters broad organizational buy-in for security priorities
Client can compare themselves to anonymous results from 20+ enterprises
who have participated in the IBM ESMW over the past 18 months
Deliverables serve as excellent communication tools for budget priorities

IBM Security Framework

Governance, Risk and Compliance

Security Intelligence and Analytics

People | Data | Applications | Infrastructure

Professional Services | Cloud and Managed Services

Advanced Security and Threat Research

Software and Appliances

*The ESWM does not replace IBM's more extensive and billable assessment services. Those billable offerings should be considered if you need a broader or deeper analysis than ESMW provides.

Characteristics of the Maturity levels

Level 5 Optimizing — Focus on process improvement

Level 4 Quantitatively Managed — Processes measured and controlled

Level 3 Defined — Processes characterized for the organization and is proactive. (Projects tailor their processes from organization's standards)

Level 2 Managed — Processes characterized for projects and is often reactive.

Level 1 Initial — Processes unpredictable, poorly controlled and reactive
